, We recently what appeared to be a new kind of search experience from Google, called “ What Do You Love? ” Google has now officially announced the project, with a bit of explanation about the reason it exists. Google ’ s Andy Berndt: A while back, a few of us wanted to make a little tool that we could use to show just about anybody more of what Google makes. That led to some simple ideas, and then a few more ideas and ultimately, to a challenge: how we could connect people to products they might not know about and may find useful, but make the discovery relevant to them and keep it fun. Playing about with that challenge produced a website—that we hope meets at least some of the challenge by demonstrating how different Google products can show you different things about any particular search query. Like always, you ’ re the judge, so . Type in something that you love—polar bears, space travel, pickup trucks, Lady Gaga, early Foghat—whatever strikes your fancy (for some reason, the results for always crack us up, so try that if you ’ re momentarily stumped). No matter what it is, we ’ ll give you back something that will let you get even more into what you love. As I demonstrated previously, results pages will show you a graphical interface with boxes for results in Image Search, Maps, Google Alerts, Patent Search, Google Trends, Product Search, Sketchup, YouTube, Books, Google

Translate, Blog Search, Picasa, Google News, Google Earth, Google Mobile Search, etc. It also has boxes for various Google tools. For example, if I tell Google I love “ hamburgers ” it will also show Gmail box telling me to email somebody about hamburgers, a Google Calendar box telling me to plan an event about hamburgers, a Google Voice box telling me to call somebody about hamburgers, a Google Moderator box telling me to organize a debate about hamburgers (a fantastic idea), a Google Groups box telling me to start a hamburgers discussion group (another great idea), and a Chrome box telling me to access hamburgers stuff on the web, faster. As far as sharing goes, you have the option to share results pages via Gmail, Google Buzz, or the +1 button. I ’ m still wondering when we ’ re going to see a straight Google+ share button. I know everybody ’ s talking about Google Buzz, but I hear that Google+ isn ’ t too shabby.,,Have you ever heard of a pneumatic tool, but wondered what in the world it is or how it is used? Essentially, it is a jack hammer, and it is used for many things. They come in all sizes and serve many useful purposes. A pneumatic tool is a tool whose action is derived from the action of compressed air. Pneumatic tools perform both heavy and light tasks and can be used in many operations. Pneumatic grinders, riveting hammers, caulking and chipping hammers, scaling tools, metal drills, rock drills, wood borers, wrenches, saws, picks, and road rippers are in common use. Compressed air, at some pressure from 60 to 120 pounds per square inch, is supplied to a pneumatic tool through tough, flexible hosing. The compressed air enters a cylinder with a piston. The compressed air expands and pushes the piston to one end of the cylinder. The expanded air is discharged from the cylinder, and the piston returns to its original position. The flow of air into and out of the cylinder is controlled by valves. As this process repeats, a rapid back-and-forth motion of the piston is produced. The motion of the piston is used to give the necessary motion to the bit, pick, or other tool piece of the pneumatic tool. Many pneumatic tools have more than one cylinder and piston. Two or four cylinders and pistons provide more power and smoother operation than one cylinder and piston. The earliest pneumatic tools were used by miners as rock drills. Pneumatic tools are still much used in mining operations. Large hammer drills that weigh several hundred pounds and are mounted on frames are used in making tunnels. Smaller hammer drills that can be carried and held in position by a man are used for drilling out ore and for other purposes. Pneumatic picks and road rippers are used to cut or break up concrete roads and sidewalks. Pneumatic spades are used for digging trenches and ditches. Pneumatic hammers are used to pack earth, sand, or gravel firmly in place. Many pneumatic tools are used in factories and machine and repair shops. Riveting hammers, scaling hammers, chipping hammers, and portable metal drills are some commonly used tools. Riveting hammers that drive in rivets by direct pressure strike 1,000 to 2,000 blows per minute. Another type of riveting hammer, called a valveless hammer, gives very light, rapid blows. Scaling hammers are used to remove paint or incrustation from surfaces.,,Facebook has launched a new mobile application that will give users around the world a full social experience on over 2,500 phones. The new app is obviously targeted for people with dumb, older phones. The Facebook mobile profile gives the full breakdown on what users can expect: “ This app not only includes Facebook ’ s most popular features, such as News Feed, Inbox, and Photos, but also enables you to upload photos and find friends from your phone ’ s contacts. ” As you might expect, users will be charged for the data they use. The good news is that Facebook collaborated with 20 mobile carriers worldwide to provide the app free of charge for the first 90 days. The list of carriers offering free data access is Aircel (India), Airtel (India), Banglalink (Bangladesh), Beeline (Russia), Celcom (Malaysia), Etisalat (Egypt, Nigeria), Globe (Philippines), Idea (India), Indosat (Indonesia), O2 Telefonica (Germany), Reliance (India), Smart (Philippines), Smartfren (Indonesia), Telkomsel (Indonesia), Three (Indonesia, United Kingdom), TIM (Brazil), TMN (Portugal), Ufone (Pakistan), Vodafone (Turkey), XL (Indonesia). One thing worth noting is that Facebook says the app is optimized to use less data than other Java apps, making it more affordable once the free

90-day period expires. You can download the app by visiting and scrolling to the download link, or enter directly into the mobile browser. You can also find the app in various app stores., Sometime over the last 24 hours TechCrunch launched aof their popular blog. Apparently the design began back last fall, before AOL ' s acquisition of TechCrunch and suffered " innumerable twists and turns along the way " ,to Dave Feldman, product manager for the redesign. What do you think of the redesign? Tell us what you think in the comments. People are creatures of habit, enjoy repetition with few welcoming change. With that philosophy in mind, some " Negative Nancy ' s " are sharing their feelings, in 140 characters or less... most notably being, co-founder of Digg., Kevin Rose whoa, new redesign.. not loving the 8bit logo via & middot; powered by, Kevin Rose whoa, just loaded on my Packard Bell 286SX16 w/CGA graphic, it ' s breathtaking! via & middot; powered by, Kevin Rose. if you rollback your redesign I ' ll rollback to Digg v3... via & middot; powered by Rose isn ' t standing alone as, famed venture investor, was a little more comical, critical of the new look., Chris Sacca The new fonts leave me expecting cock shot expos é s riddled with sponsored links for diet pills and e-cigarettes. via web & middot; powered by, Chris Sacca Well, to be clearer, looks like it was pimp-slapped by Interstate Bold and pearl necklaced by Caps Lock. via web & middot; powered by, Chris Sacca Dude. I can ' t stop scrolling down the page looking for the nip slip articles. I wish all this tech content weren ' t in the way. via web & middot; powered by The criticism isn ' t just limited to people with Internet fame, as thousands of everyday TC readers are on the " we hate the new look / logo " bandwagon., Darby Lines I don ' t get all the hate for the TechCrunch re-design. A shitty site *should* have a shitty design. Sort of an early warning system. via & middot; powered by, Amrita Mathur The site re-design is nice enough, but it feels like we ' re going back in time. Not happy w the distracting hot topics bar either via web & middot; powered by, Oliver Beattie Well, the new design is... interesting. Still slow as shit thanks to all those iframes (that could easily be loaded on demand now) via & middot; powered by Too be fair, there are those who actually like the TC redesign, and welcome the modifications to the blog. We ' re sure that TC knew what they were getting themselves into, as they have a blog post titled " " . Well congrats, as this seems to be the exact sentiment being shared on Twitter. In the post Feldman talks in depth about the controversial logo: " I love it, though that ' s no accident: we went through many, many options with Code & Theory before finding one we liked. It ' s bold, simple, and versatile. It works in any context — from a tiny monochrome icon to a mosaic on a poster. It fits the TechCrunch brand perfectly. And no, we didn ' t build it in Minecraft. We used AOL Paint, which comes free on the AOL CD and has this sweet UltraLogoMatic2000 feature. " Personally, the logo is the only part of the re-do I don ' t like. Actually, for the most part it just feels like an everyday WordPress site, nothing more, nothing less. Do you like TechCrunch ' s new logo? Tell us your thoughts in the comments., Hail to the King, baby. That ' s what ' s happening on Twitter right now as the almighty Bruce Campbell has joined, just in time to confirm rumors of a fourth Evil Dead movie. If ever an actor exemplified " cult classic, " it ' s Campbell, after starring in such gems as the aforementioned Evil Dead series, Bubba Ho-Tep, and the USA Network series, Burn Notice, among others. To the general public, Campbell is probably most recognized for his cameos in the Sam Raimi-directed Spider-Man movies, but his credibility with the geek sector is white-hot. That probably explains why both Bruce and the are trending on Twitter at the moment. Not only did, but he also indicated the Evil Dead sequel is, in fact, real., Bruce Campbell Believe in the remake, dawg! The project is real. In the works. Cool as hell. Scary as hell. via & middot; powered by While some may be troubled by the " remake " portion of Campbell ' s post, the fact that they are indeed going ahead with another installment of Evil Dead is reason enough to rejoice. Granted, some pointed out the delay between Indiana Jones sequels as cause for concern, but then again, George Lucas has nothing to do with the Evil Dead series, so perhaps these fears are unfounded., Ian Buckwalter Normally, I ' m against franchises
